

1

Responsive thoughts: Nest the page buttons on the right within hamburger menu access. Bump the images into a vertical stack if necessary.

2

Would like to express number of Rolls (pulled from a gDocs sheet). May include a stats page down the road, so would like to try collecting roll information (die types, quantities and modifier) and location (IP address?) for future use.

[Get Rolling](#)[About](#)

Get Rolling

To begin, specify the number of dice and select the die type. Use the Roll Settings to set up more advanced rolls.

Setup

Die Set 1:

3

d6

Modifier:

3

3d6 + 3  

Roll...!

Results

(3d6 + 3):

15

Range: 6 - 21 | Median: 13.5

Roll Details:

3d6: (4 + 5 + 3) = 12

Modifier: +3

Total: (12 + [3]) = 15

The screenshot shows the Gogobones website interface. At the top, there's a navigation bar with the Gogobones logo, a 'Get Rolling' button, and an 'About' button. Below this is a large, faded image of a die. The main content area is divided into two sections. On the left, the 'Roll Settings' menu is open, showing options to 'Include a second Die Set' (unchecked) and 'Include a Roll Modifier' (checked). Below these are 'Favorites' with two items: '3d6 + 3' and '3d6 + 1d4'. On the right, the 'Get Rolling' section has a 'Setup' area with a gear icon. The 'Setup' area includes 'Die Set 1:' with a dropdown set to '3' and a die type dropdown set to 'd6'. Below that is a 'Modifier:' section with a plus icon and a dropdown set to '3'. At the bottom of the 'Setup' area, the current roll is displayed as '3d6 + 3' with a star icon. A large 'Roll...!' button is at the bottom of the main content area. The footer contains the copyright notice '© 2015 Christopher Zalek' and a Twitter icon.

Note to self... how do I make customized dropdown menu buttons?

2

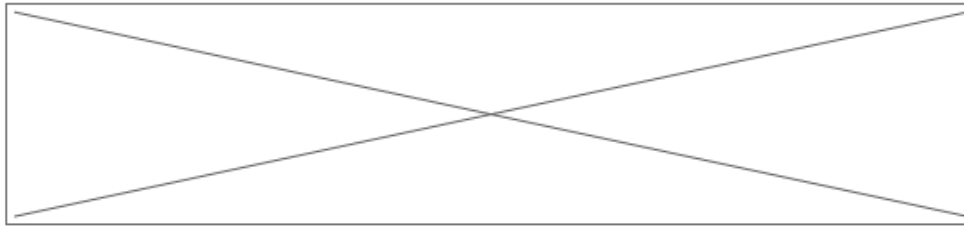

Because there is no need for redundancy within the die types of two sets, the die type chosen for Set 1 affects the available types in Set 2. For example, if Set 1 is set to "d6", the selections available for Set 2 would be: d2, d3, d4, d8, d10, d12, d20, d100 (d6 is culled).

About Gogobones

In all honesty, we don't believe that Gogobones could match the actual experience of throwing dice. Aside from the excitement built through pre-emptive rattling and the unique sound of each cast, we know that gamers have often tailored their art of "throwing bones" into personal rituals... be that through using a favorite set of dice, employing unique body mechanics and/or shouting a colorful soliloquy. These expressions are something that we would never want to replace.

Gogobones was created as an answer to the need for making dice rolling available to roleplaying and board game sessions with remote players. While there are some solutions out there already, we wanted to simply focus on the ability to set up and roll in an environment that could be shared online. We also thought the interface should be clean and work well with touchscreen and mobile devices.

Thank you for taking a chance with Gogobones.
