Welcome to Gogobones...!

Did you lose your bag of dice somewhere between the hotel and GenCon?

Is your space ranger leveling faster than your d6 collection can maintain?

Has the first half of a tabletop weekend marathon left you unable to add?

Gogobones can help! With Gogobones, you can quickly set up, fire off and tally any roll you need...!

Get Rolling

Gogogones rolls to date:

1123 (2)

(1) Responsive thoughts: Nest the page buttons on the right within hamburger menu access. Bump the images into a vertical stack if necessary.

(2) Would like to express number of Rolls (pulled from a gDocs sheet). May include a stats page down the road, so would like to try collecting roll information (die types, quantities and modifier) and location (IP address?) for future use.

(1) Clicking the Gear icon causes the Roll Settings menu to slide in from the right.

(3) User can select select and remove Favorite roll setups from this area of the Roll Settings menu. Need to add text indicating use of cookies in the browser.

(2) Toggling the checkboxes will display/hide the respective row within the Setup area.

Setup ⚙

Die Set 1:   3 ▼   d6 ▼

1
2
3
4
5
6
7
8
9
10+   ①

Modifier: 3 ▼

Result (3d6 + 3):

15

Range: 6 - 21 | Median: 13.5

Roll Details:

3d6: (4 + 5 + 3) = 12

Modifier: +3

Total: (12 + [3]) = 15

① Would like to keep the dropdown to a minimal length, but am aware that some rolls require a higher quantity. If "10+" is selected, a modal is called for the user to manually input a value.

Modifier: +3

Total: (12 + [3]) = 15

① Note to self... how do I make customized dropdown menu buttons?
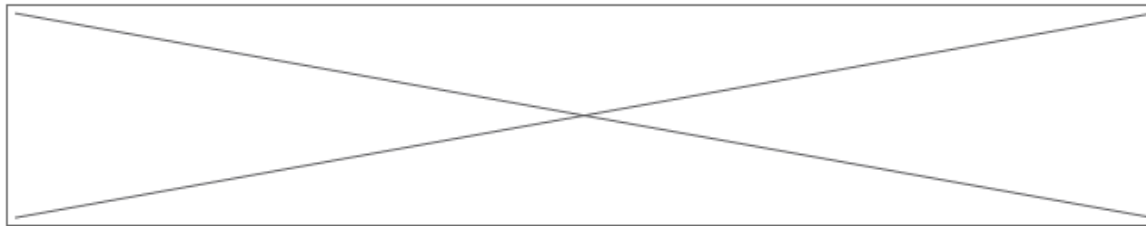

② Because there is no need for redundancy within the die types of two sets, the die type chosen for Set 1 affects the available types in Set 2. For example, if Set 1 is set to "d6", the selections available for Set 2 would be: d2, d3, d4, d8, d10, d12, d20, d100 (d6 is culled).

About Gogobones

In all honesty, we don't believe that Gogobones could match the actual experience of throwing dice. Aside from the excitement built through pre-emptive rattling and the unique sound of each cast, we know that gamers have often tailored their art of "throwing bones" into personal rituals... be that through using a favorite set of dice, employing unique body mechanics and/or shouting a colorful soliloquy. These expressions are something that we would never want to replace.

Gogobones was created as an answer to the need for making dice rolling available to roleplaying and board game sessions with remote players. While there are some solutions out there already, we wanted to simply focus on the ability to set up and roll in an environment that could be shared online. We also thought the interface should be clean and work well with touchscreen and mobile devices.

Thank you for taking a chance with Gogobones.

About Chris Zalek

Chris Zalek is a freelance designer and digital artisan living in Chicago, Illinois. When he is not working, he maintains a regular Tai Chi practice and enjoys keeping busy as a tinkersmith and chaotic do-gooder.
